

Machine for automatic opening of medications boxes and removal of blisters from these boxes fast and easily. The Deboxmatic L19 saves money and saves your employees' hands.

Main Features:

- Deboxing of any type of medication blisters
- Box dimensions: minimum LxWxH 70x30x18 mm
maximum LxWxH 160x80x40 mm
- Box dimensions up to: LxWxH 160x80x80 mm, by using a special, optional, tool
- Automatic stacking of blisters into stacks that can be placed in the magazine of an automatic deblistering machine.

Since 'seeing is believing', please look at a short video of the Deboxmatic L19 in action by clicking on the following link: [Deboxmatic L19 in action](#)

The Deboxmatic L19 has a magazine that can hold up to approximately 200 boxes that have to be opened. In addition, the Deboxmatic L19 is provided with an automatic blister stacking device.

The Deboxmatic® L19 is supplied with one standard box opening tool which is suitable for the opening of boxes with dimensions up to 160x80x40 millimeters.

As indicated above the machine can open boxes with dimensions up to 160x80x80 millimeters by installing a special box opening tool. The latter tool should be ordered separately if needed.

Indicative operational performance data*:

Maximum deboxing speed: 20 boxes per minute.

Deboxing percentage: > 95 %

*The above-mentioned deboxing speed and percentage are examples of what has been achieved and depend on the type of box and number of blisters in the box. Hence, they don't constitute any legally binding specification.

One Deboxmatic L19 can open and unpack approx. three times the number of boxes that can be opened/unpacked by a person in the same amount of time. So, the Deboxmatic L19 plus one operator can replace three people, hence, saving the cost of two employees. Therefore, the payback time of a Deblimatic L19 is usually less than one year.

Electrical connection data:

Voltage: 220 – 240 Volt 50Hz

Average power consumption during operation: 0.5 kW

Fuse: 16 Amp automatic

Operating temperature range: 10 – 30 °C

Machine dimensions: 900 x 600 x 1500 mm

Weight: approx. 85 kg
