

LO&T has developed and launched the *Rollmatic L20* for the packaging of letterbox size boxes and envelopes.

The medication roll is easily placed on the mandrel in the drum of the Rollmatic. The stuck-on label needs to be removed.

During the enlargement process, the adhesion is re-established automatically.

The Rollmatic turns a small medication roll into a large one in a few seconds so that it meets the dimensions to be packed flat in letterbox-sized packaging.

### Key features:

- Easy to operate
- Easy to move
- Cycle time < 4 sec.

### Electrical data:

Voltage: 220-240 Volt, 50Hz

Power: 0.25 kW

Fuse: 16 Amp circuit breaker

Operating temperature: 10-30 °C

Dimensions: W x D x H = 500 x 300 x 880mm

Weight: approx. 25 kg

*The trolley is made from 99% sustainable materials, which means it has a very long life span and is maintenance free.*
